## Dredge Bucketwheel Cutters

Neumann Equipment design and manufacture bucketwheel cutters to suit any dredging application. They are individually designed to suit your dredging application depending on the size of your dredge.

Bucketwheel assemblies can be provided to suit your specific application. These assemblies include, but are not limited to the gearbox, suction, and ladder mount.

Neumann Contractors have been manufacturing and operating dredge equipment for over 50 years. These bucketwheels have been proven in mineral mining, marine sand extraction and tailings pond maintenance.

Our bucketwheel cutters have been continually improved over many years to optimise efficiency and wear characteristics, delivering optimal output for each specific application.

All of our bucketwheel cutters designs are verified using Finite Element Analysis (FEA), manufactured and tested to meet industry standards. They are Built Tough and Designed to Last!

### Standard Inclusions:

- Cast iron and carbon steel construction.
- Ground engaging teeth (GET) and adapters to suit specific application.
- Buckets design to suit specific requirements.
- All metal components are grit blasted and primed with two-pack epoxy primer and finished with heavy-duty two-pack epoxy polyamine marine coatings.

### Available Options:

- Knife edge wear plates on all leading edges.
- Chocky bar wear plates were required.
- Hard face welding inside and outside buckets.
- Suction chutes.
- Gearbox design and manufacture.
- Ladder mounting system.
- Application specific wear packages, including hard facing, wear plates, GET, knife edges and chocky bars.

Please contact us by phone or email to discuss your dredge bucketwheel cutter requirements.
