Pedestal Capstan Winches

Neumann Equipment pedestal capstan winches are designed and manufactured from high quality components for marine environmental conditions, providing years of dependable service. We specialise in custom built capstan winches to satisfy your mooring requirements that meet relevant marine industry standards.

The following photos of custom designed pedestal capstan winches have been provided for reference of our capabilities and excellence. These custom-made capstan units can be mounted on the wharf or on the vessel and can be used to haul or pull your vessel toward the dock.

All of our pedestal capstan winches are designer verified using Finite Element Analysis (FEA), manufactured and tested to meet marine industry standards. They are Built Tough and Designed to Last!

Advantage of a Pedestal Capstan Winch:

- Various rope sizes can be used.
- Hauling can commence at any point along a length of rope.
- Elimination of the requirement to unwind long rope lengths.
- To control start/stop the pull, you simply increase or reduce the amount of tension you are applying to the rope.
- Rope is free to be pulled out by another source.

Standard Inclusions:

- Electric or Hydraulic drive motor.
- Various size capstan head-up to 450mm diameter.
- Ergonomically design pedestal height.
- The base and drum are fabricated from carbon steel as standard.
- All components are grit blasted and primed with two-pack epoxy primer and finished with heavy-duty two-pack epoxy polyamine marine coatings.

Available Options:

- Line pull capacities - up to 10,000kg.
- Hauling line speeds - up to 30 metres per minute.
- Variety of base types/styles.
- Stainless steel construction.
- Reduction gearboxes - gearbox type to suit requirements.
- Integrated electro-hydraulic powerpack.

Please contact us by phone or email to discuss your pedestal capstan winch requirements.
