Self-Contained Diesel/Electro-Hydraulic Winch Units

Neumann Equipment self-contained diesel/electro-hydraulic winch units are specifically designed for hauling applications allowing the unit to be used independent of external power sources. They are manufactured from high quality components and will provide years of dependable service.

The self-contained winch unit package consists of a:

- Hydraulically driven winch.
- Diesel/electro-hydraulic powerpack.
- Skid mounting frame.

These self-contained winching units offer both variable winching speeds. All models can be optioned with a level wind to suit the specific rope diameter fitted to the winch

All of our diesel hydraulic winch unit designs are verified using Finite Element Analysis (FEA), manufactured and tested to meet industry standards. They are Built Tough and Designed to Last!

Standard Inclusions:

- Diesel/electro-hydraulic powerpack.
- Fully Integrated proportional hydraulic control system.
- Integrated hydraulic air blast cooler allowing for high duty cycle.
- Fully lockable power pack unit.
- Fuel capacity capable of 8 hours of typical usage.
- Standard winch units of 4, 6 and 10 tonnes.
- Variable speed operation.
- Wireless pendant control.
- Winch base and drum are fabricated from carbon steel.
- All components are grit blasted and primed with two-pack epoxy primer and finished with heavy-duty two-pack epoxy polyamine coatings.

Available Options:

- Line pull options up to 20 tonnes.
- Live monitoring of distance and tension.
- Data logging with USB export options and remote login.
- Guarding to suit specific site requirements.
- Standard rope capacity 1000 meters. Can be designed to store increased capacities.

Please contact us by phone or email to discuss your self-contained diesel/electro-hydraulic winch unit requirements.
