Self-Contained Hydraulic Powerpack Units - Over 18.5kW

Neumann Equipment manufactures a range of self-contained diesel or electric powered hydraulic powerpack units that can power hydraulic plant and equipment. Each powerpack unit is powered by a diesel engine or 3-phase electric motor.

These units are selected with hydraulic flow to suit your application. They are manufactured from high quality components and will provide many years of dependable service.

These systems can be used to power a range of applications including but not limited to winches, hydraulic cylinders, hydraulic motors, conveyors, drill rigs, trommel or centre pivot irrigation.

All of our hydraulic powerpack units are designed by qualified hydraulic specialists and tested in house prior to delivery. They are Built Tough and Designed to Last!

Standard Inclusions:

- Diesel engine or electric motor.
- Diesel engine management control panel. (diesel engine)
- Diesel fuel tank with sight gauges. (diesel engine)
- Hydraulic oil tank designed to suit pump capacity.
- Proportional directional control valve.
- Return oil filter.
- Air blast hydraulic oil cooler.
- Electrical control system to suit either diesel or electrical power.
- Bulkhead hydraulic fittings to allow connection from the unit to a range of applications.
- Fully lockable cabinet.
- Power isolation lockout switch.
- Soft starter (electric motor).
- All metal components are grit blasted and primed with two-pack epoxy primer and finished with heavy-duty two-pack epoxy polyamine industrial coatings.

Available Options:

- Custom designed unit to suit your specific capacity and application requirements.
- Noise reduction package.
- Bunded base.
- Custom designed hydraulic manifold to suit a range of actuators.
- Wireless pendant control.

Please contact us by phone or email to discuss your powerpack requirements.
