Hydraulic Powerpack Units - Under 18.5kW

Neumann Equipment manufactures a range of compact hydraulic powerpack units that can power hydraulic plant and equipment. Each powerpack unit is powered by a petrol, diesel, or an electric motor. These units are selected with hydraulic flow to suit your application. They are manufactured from high quality components and will provide many years of dependable service.

These systems can be used to power a range of applications/tools including, but not limited to:

- Winches.
- Hydraulic cylinders.
- Hydraulic motors.
- Hydraulic power tools.
- Submersible pumps.
- Auger drills.
- Core drills.
- Impact wrenches.

All of our small hydraulic powerpack units are designed by qualified hydraulic specialists and tested in house prior to delivery. They are Built Tough and Designed to Last!

Standard Inclusions:

- Diesel/petrol engine or electric motor.
- Hydraulic oil tank designed to suit pump capacity.
- Return oil filter.
- Electrical control system to suit either diesel or electrical power.
- All metal components are grit blasted and primed with two-pack epoxy primer and finished with heavy-duty two-pack epoxy polyamine industrial coatings.

Available Options:

- Custom designed unit to suit your specific capacity and application requirements.
- Proportional directional control valve.
- Air blast hydraulic oil cooler.
- Fully lockable cabinet.
- Power isolation lockout switch.
- Soft starter (electric motor).
- Bunded base.
- Custom designed hydraulic manifold to suit a range of actuators.
- Wireless pendant control.

Please contact us by phone or email to discuss your powerpack requirements.
